ABOUT ME

So far, it has been three years since I started programming, and I have learned many technologies, such as Python, Django and data analysis. Afterward, I got my first job as a developer, where I have been expanding my skills in Python, MongoDB, and Git. In my second job I developed skills and knowledge in automations with Python and PostgreSQL.

WORK EXPERIENCE

Backend Developer

(May 2023 - Present)

Experis - <https://www.experis.com.ar/>
Amdocs - <https://www.amdocs.com/>

- Development and maintenance of scripts with Python.
- Creation of procedures, triggers and functions.
- Storage and manipulation of data in databases with PostgreSQL.
- Use of Git and repositories.

Python Developer & Software Support

(Nov 2021 - May 2023)

BB Media - <https://bb.vision/soluciones-es/>

- Development and maintenance of scripts with Python.
- Streaming page scraping and data analysis with Pandas and NumPy.
- Storage and manipulation of data in databases with MongoDB.
- Use of Git and Agile Methodology.

EDUCATION

Degree in Computer Science

(Mar 2020 - Present)

Universidad Siglo 21 - <https://21.edu.ar/>

Studying third year, preparing the final exam to obtain the intermediate Degree of Computer Systems Analyst.

Roseland School of English

(2019 - Present)

English classes

Studying fourth year.

COURSES

Backend development with Python and Django

Platzi - <https://platzi.com/backend-python/>

- Advanced level Python
- Object-oriented programming
- Web development

Data Engineer

Platzi - <https://platzi.com/dataengineer/>

- Automations
- Web Scraping
- Cloud computing
